OBJECTIVE

I am seeking a Branch Manager position in the banking sector where I can utilize my project management experience in finance, operations, and audit to lead high-performing teams, enhance branch operations, and deliver exceptional customer service.

EXPERIENCE

Project Manager

Focus Engineering - Gudiyattam
20/05/2023 to Till Date

- Leading multiple cross-functional projects in finance and automotive sectors, managing diverse teams across India and international markets.
- Supervise a 7-member team for the Australia Home Loan Backend Project, building systems to track customer data and key service timelines.
- Overseeing application development with a 6-member team, including:
  Advanced service tracking form to monitor customer interactions and service progress Parts audit scanner and reporting tool to automate inventory checks and generate audit reports Billing software to streamline invoicing and reduce manual entry errors
- Manage a TVS Vehicle Market Survey across 13 countries, coordinating with a 5-member core team in Vellore, plus local surveyors: analyzing competitor data for 2W and 3W vehicles.
- Manage the Process audit, AD, and AMD audits for TVS, working with regional audit teams to ensure compliance and operational quality.
- Developing MG Trading Material EOP (End of Process) documentation using PowerPoint and Articulate Storyline, supporting training and knowledge transfer for internal teams Tools used: Excel (Power Query), React.js, Node.js, PowerPoint, Azure, Articulate 360 Storyline
- Outcomes: Reduced project delays, improved cross-team communication, and enhanced reporting efficiency across multiple systems

PROJECT

Anti-Drunk and Drive Car Safety System:

- A This is a mini project. The motive for this project is a lot of accidents are happening in the current period because of drink and drive. We have developed this project to stop drunk and driving in the car using fuel cell sensors.

Road traffic monitoring system:

- This is my final year project. The motive of this project is reducing the traffic problem using Camera and motion sensor. We have developed this project for Time saving. This project will find out whether there is traffic or not and update it in mail using IOT

Certifications:

- Course completion in python conducted on 2023 Certificated by GUVI Geek Networks.
- Course completion in JavaScript conducted on 2023 Certificated by GUVI Geek Networks.
- Online skilling course completed in AI for India 2.0 course offered by GUVI through Skill India Digital in 2023.
- Value Added Course in IOT Application using RASPBERRY PI Conducted on 2022 Certificated by NSIC-Technical Services Center
